

October 2025 Newsletter

As we move toward the end of the year, it's the perfect time to review your laboratory's systems, processes and training plans for 2026. This edition includes practical resources to support your continuous improvement journey, with guidance on improving audit readiness and performance, the release of our new 2026 training calendar, and details of our upcoming free webinar on assessing staff competence.

Featured Article

3 Key Steps Your Lab Needs to Implement Now

Laboratories that succeed are those that integrate quality into every process and actively seek opportunities to improve. In this article, we outline three practical actions your lab can implement immediately to strengthen internal audits, improve risk management, and enhance staff skills and engagement. These steps are designed to help your team go beyond basic compliance, drive efficiency, and foster a culture of continuous improvement.

Organisations that implement structured quality systems often report significantly fewer non-conformances and faster turnaround times. Case studies suggest that implementation of structured quality systems can lead to double-digit improvements in non-conformance reduction and lead-time/turnaround performance.
