

# NATA Education & Advisory Services

## June 2026 Newsletter

Dear NEAS client

Welcome to this month's edition of the NATA Education & Advisory Services Newsletter.

### NEAS news...

#### Beat the price rise

##### Getting training off to a great start in FY27

We know that end-of-financial-year promotions can sometimes create pressure to make decisions quickly. Rather than asking you to commit before EOFY, we're extending our current pricing until 31 July 2026, giving you extra time to consider your education and advisory needs and make the right decision for your organisation.

If you've been considering training for the year ahead, booking before 31 July locks in current pricing for sessions scheduled later in the year.

To ensure we continue delivering the high-quality education and advisory services you rely on, our prices will increase from **1 August 2026**.

**GET IN BEFORE  
31 JULY 2026**

to secure  
the current  
pricing

## What's new and interesting...

### Three questions every laboratory should be asking before EOFY

#### Article

With workforce pressures, evolving compliance requirements, and increasing operational demands, laboratories are facing more challenges than ever before. As you prepare for the new financial year, taking the time to review your capability, systems, and strategic priorities can help build a stronger, more resilient organisation.

In this article, we explore three key questions every laboratory should be asking before EOFY.

# Beyond Hazards & PPE:

## Embedding psychological health into laboratory safety systems

### Insights from our recent webinar

[EXPLORE WEBINAR  
RESOURCES](#)

Psychological health and safety are becoming increasingly important considerations for laboratories, with research showing that psychosocial risks such as excessive workload, workplace conflict, bullying, and role ambiguity can significantly impact both employee well-being and organisational performance. In this presentation,

Alexander Walsh explores the difference between psychological and psychosocial safety, examines the growing impact of mental health-related workplace claims, and shares practical strategies laboratories can use to identify, manage, and reduce psychosocial risks. The session highlights why creating psychologically safe workplaces is not just a wellbeing initiative, but a critical component of quality, safety, and operational excellence.

## Course Spotlight

### General Quality Management Systems

#### Build a stronger management system.

Whether you're new to quality management or looking to sharpen your skills, our **General Quality Management Systems (GQMS) Program** gives you the foundations to make a real difference in your organisation.

Over 10 weeks, you'll work through the core pillars of any quality system, from risk

management and documentation to auditing, data integrity, and continuous improvement. Sessions are delivered virtually in bite-sized 2.5-hour weekly modules, so learning fits around your work.

Suitable for new starters, quality leaders, and everyone in between across all industries. Our next program starts on 22 July. Don't miss out!

## Events

### Heading to Accreditation Matters?

Come and say hi.

We'd love to see you at our session, 'Preparing for Assessment: What Actually Works', where laboratory clients, NATA assessors, and advisors get honest about what really makes the difference when it counts.

**Insights That May Change Your Approach in Preparing for an Assessment**

Tue Jul 7, 2:15pm → 2:45pm

Room #105

5 SPEAKERS

#### Overview

Preparing for assessment isn't just compliance. This panel unpacks what truly works, bringing laboratories, NATA assessors and advisors together to reveal common pitfalls, simplification strategies, assessor expectations, risk-based thinking and the practical turning points that build confidence and accreditation systems.

The word **"laboratory"** comes from the Latin word *laborare*, meaning "to work" or "to toil" a fitting description for the behind-the-scenes work that supports quality, safety, and innovation.

See you next month.
